

Rockgate Revises Global Resource Estimate, Falea Uranium-Silver Project, Mali

Vancouver, British Columbia, May 15, 2009 - Rockgate Capital Corp. (TSX Venture: RGT) (the "Company") has been advised by independent consultant Golder Associates that the uranium results announced in the Company's May 14, 2009 news release are incorrect and must be restated. The reason for the restatement is based on the misinterpretation by Rockgate's chief geologist of the uranium results stated in the Golder Associates report. The net effect of the restatement is a lowering of the uranium resource by approximately 17%. The silver resource estimate remains the same.

Tables #1 and 2 below contain the corrected total mineral resource at Falea, tonnes and grade at 0.03% U₃O₈ cut-offs based on ordinary Kriging and uncapped and capped values respectively. The total resource at Falea entails the Central, North and Bodi Zones combined. U₃O₈ and Silver values are rounded to nearest 1000. The complete Golder Associates report will be available on SEDAR within 45 days.

Table # 1- Uncapped Total Resource

Resource Category	Cut-off U ₃ O ₈ (%)	Tonnes	U ₃ O ₈ (%)	Ag (g/t)	U ₃ O ₈ (lbs)	Ag (oz)
Indicated	0.03	572,000	0.069	61	871,000	1,116,000
Inferred	0.03	10,270,000	0.086	92	19,381,000	30,484,000

Table #2- Capped Total Resource

Resource Category	Cut-off U ₃ O ₈ (%)	Tonnes	U ₃ O ₈ (%)	Ag (g/t)	U ₃ O ₈ (lbs)	Ag (oz)
Indicated	0.03	469,000	0.076	48	867,000	723,000
Inferred	0.03	8,502,000	0.094	78	17,910,000	21,373,000

- Using the 0.03% U₃O₈ cut-off and capped values the North Zone contains a total resource of 13,989,000 pounds U₃O₈ and 21,676,000 ounces of silver representing 75% and 98% respectively of the total resources at Falea. Refer to Table # 3 for the North Zone resource.

Table #3 Capped North Zone Resources only

Resource Category	Cut-off U ₃ O ₈ (%)	Tonnes	U ₃ O ₈ (%)	Ag (g/t)	U ₃ O ₈ (lbs)	Ag (oz)
Indicated	0.03	76,000	0.132	246	222,000	601,000
Inferred (West side)	0.03	2,453,000	0.124	110	6,723,000	8,708,000
Inferred (East side)	0.03	3,882,000	0.082	99	7,044,000	12,367,000

Rockgate chief geologist Lorne Warner stated “I take full responsibility for this situation. My calculation error was based on an incorrect assumption from the information provided in the Golder report and I deeply regret the mistake.”
